

CONTENTS

12 PART 1: AN OVERVIEW OF TRANSPORT INNOVATION IN AUSTRALIA

14 CHAPTER 1: INTRODUCTION

16 CHAPTER 2: GOVERNMENT PROGRAMMES BUILDING THE TRANSPORT SECTOR

16 Australian Government

17 National associations

19 State and Territory Governments

21 Case study: National ITS Centre of Excellence

22 Australian Government Department of Transport and Regional Services

– Transport and innovation

– AusLink

30 Queensland Government: Queensland Transport and the Department of Main Roads

– Smart transport technology for the 'Smart State'

– Case study: TravelSmart programme

– Case study: Kan-go Flexible Transport Trial

34 Victorian Government:

Department of Infrastructure

– Outcome-focused planning

Department of Innovation, Industry and Regional Development

– Victoria: The state of supply chain excellence and the gateway of choice

38 Main Roads Western Australia – Deploying innovative and sustainable solutions

40 CHAPTER 3: TRANSPORT RESEARCH

40 Overview

41 Case study: Taking transport and planning to a higher degree

42 Major Australian Centres for Transport Research

45 Australian Research Council

46 PART 2: TRANSPORT TECHNOLOGY SOLUTIONS

48 CHAPTER 4: SAFETY AND SECURITY

48 Overview

48 Safer roads

48 Safer drivers

49 NRMA Motoring & Services – Delivering services to motorists and members

50 Safer vehicles

51 Australian Government's role in transport security

51 Secure identity

52 Road safety research organisations

53 NRMA Motoring & Services – Case study: Mobile motoring services hit the road

54 Case study: Safe-T-Cam highway vehicle identification network

54 ARRB Group – Case study: Road safety risk manager

- 55 **Tenix Solutions** – Case study: Road safety alert system
- 56 **Transfield Services** – Case study: Rail maintenance training course
- 57 Case study: Sentinel's road sense leads to improved road safety outcomes
- 57 **Thales Telematics** – Case study: ISS Sentinel – Real time accident response

58 CHAPTER 5: ADVANCED TRAFFIC MANAGEMENT

- 58 Overview
- 58 Systems & services

- 59 **Tenix Solutions** – Partnering for innovative solutions

- 60 **Hyder Consulting** – Case study: EastLink patronage forecasts

- 61 Case study: Sydney Coordinated Adaptive Traffic System

- 62 **Transfield Services** – Case study: Ensuring Melbourne's traffic keeps moving

- 63 **Transmax** – STREAMS – Enterprise ITS

- 64 **Masson Wilson Twiney**

- Case study: Micro-simulation link to real-time systems – a world first
- Traffic and transport consultants

- 66 Case study: Tunnel management in Sydney's M5 East Motorway Tunnel

- 67 Case study: Adelaide Crafers Highway

- 67 **ARRB Group** – Advancing safety and efficiency in transport through knowledge

68 CHAPTER 6: ADVANCED PUBLIC TRANSPORT

- 68 Overview
- 68 New infrastructure
- 69 New vehicles
- 70 New regulatory models
- 70 Use of advanced technologies

- 72 **Queensland Transport** – Case study: Building a metropolitan busway network

- 73 Technology brief: Dataspeed – Total integration

- 74 **Victorian Department of Infrastructure** – Case study: Melbourne SmartBus passenger information system

- 75 Technology brief: Assisting taxi drivers to navigate safely

76 CHAPTER 7: LOGISTICS

- 76 Overview
- 76 Factors characterising the industry
- 79 New developments
- 81 Partnerships – the way of the future
- 81 Case study: Metcash adopts innovative technology logistics solutions
- 82 Case study: Revolutionary fully-automated waterfront operations

- 84 **Optus** – Case study: Cold Chain Tracking and Monitoring

- 84 Case study: Collaborative initiatives through ECR Australasia

- 85 Case study: Vehicle distribution – meeting customers' needs

- 86 Case study: BlueScope Steel, OneSteel and Pacific National align their businesses

- 87 **GS1 Australia** – Technology brief: Star Track Express embraces global supply chain standards

88 CHAPTER 8: ENABLING TECHNOLOGIES

- 88 Overview
- 88 Communications
- 88 Fixed site communications
- 88 Mobile communications

89 GS1 Australia – Global open standards are key to e-logistics

- 90 Internet
- 90 Mapping
- 91 Other enabling activities

91 Optus – Integrating transport and communications

- 92 Case study: Building map data
- 92 Case study: ITS standards essential for success
- 93 Case study: Cohda wireless communication for emergency vehicles

94 CHAPTER 9: ELECTRONIC TOLLING

- 94 Overview
- 94 Electronic tolling – realising the benefits
- 95 Electronic toll collection driving urban road projects

97 Hyder Consulting – Hyder leads in intelligent transport systems

- 98 Making projects happen
- 98 Case study: Toll booths to call centres
- 99 Case study: Interoperable e-tolling in Australia

100 Transurban – Case study: CityLink customer advantage

101 Masson Wilson Twiney – Case study: Toll plaza modelling

102 CHAPTER 10: THE AUTOMOTIVE INDUSTRY

- 102 Australia's automotive industry
- 103 Markets and sales
- 103 Research and development
- 104 CRC for Advanced Automotive Technology
- 104 Emission control
- 105 Case study: New South Wales audited maintenance programme
- 106 Case study: The automotive competitiveness and investment scheme test case
- 107 Case study: US icon made in Australia

108 Western Australian Department for Planning and Infrastructure
– Case study: EcoBuses a viable reality – enter clean, green and sustainable public transport

- 109 Telematics in Australia

110 CHAPTER 11: INNOVATION IN RAIL

- 110 Overview
- 110 Rail: vital statistics
- 110 The key players
- 110 Challenges for rail
- 112 Rail management and operations: innovation

113 Rail CRC – Australia's rail research centre

- 114 ITS and rail
- 114 Education and training
- 115 The future of rail in Australia

115 Rail CRC – Technology brief: FreightMiser fuel optimisation

116 Rail CRC – Technology brief: ScheduleMiser – optimising train schedules

- 116 Technology brief: Keeping the wheels on track

117 Rail CRC – Technology brief: Reducing the risk of derailments

- 117 Technology brief: ViziRail train planning software

118 PART 3: INNOVATIVE INFRASTRUCTURE AND SERVICE PROVISION

120 CHAPTER 12: INFRASTRUCTURE AND SERVICE DELIVERY

120 Overview

121 **Transfield Services** – Partners for change

122 Forms of Public-Private involvement

123 **Southern and Eastern Integrated Transport Authority**
– EastLink – innovative infrastructure and service delivery

124 Public Private Partnership (PPP) policy

127 Project evaluation

128 **Transurban** – Case study: CityLink Toll Road Melbourne

129 Case study: Rolling stock public private partnership

130 Case study: WestLink M7 Toll Road Sydney

131 **ARRB Group** – Technology brief: Austroads Guide to Project Evaluation
– Case study: Application of HDM-4 in the development of
a road asset management plan in Tasmania

132 PART 4: ACHIEVING EXPORT SUCCESS

134 CHAPTER 13: EXPORT SUCCESS BASED ON KNOWLEDGE AND CAPABILITY

134 Overview

134 Australian capacity and expertise

135 Case study: Planning that protects the environment and cuts cost

136 **Transfield Services** – Case study: New technology on the New Zealand rail network

137 **GHD** – Case study: World's largest car park

138 Case study: Queensland Rail – specialist knowledge carries the day

139 **ARRB Group** – Case study: Road safety education programme in India

139 Case study: Chiron Commercial Vehicles

140 PART 5: EMERGING INDUSTRY SECTOR

142 CHAPTER 14: TRANSFORMING THE TRANSPORT SECTOR

142 Overview

142 Australian automobile technology

142 Video processing

143 Heavy vehicles

144 The roads and beyond

144 Case study: A cleaner, greener energy solution for heavy transport

145 Case study: Scramjet success

146 Case study: Australian technology provides a ticket to ride

147 Case study: Biometric identification aids security

147 Case study: Seeing Machines see the road and driver
